Workshop 3.1: Tech Hub Launch - Open Source & Standards

Phase 3: Digital Innovation

Workshop Code: WS 3.1
Primary Component: Data Centre Expansion (Tech Hub #1 of 5)
Duration: 2 days
Timing: Month 7, Week 2-3
Phase Theme: "Empowering the Digital Ecosystem"

Executive Summary

This workshop marks a critical transition—transforming Trinidad & Tobago's data centre from traditional government infrastructure into an innovation hub that empowers the broader digital ecosystem. Building on the infrastructure planning from Workshop 1.2, this workshop activates the "tech hub" vision by establishing sandbox environments, open-source governance, and partnerships with universities, developers, and the Caribbean community. This is the first of five tech hub workshops and sets the foundation for emerging technology exploration (AI/ML/blockchain/IoT in WS 3.2) and private sector engagement (WS 3.3).

Key Outcome: Operational tech hub framework with sandbox environments, open-source contribution model, and active developer/academic community engagement.

Workshop Objectives

Primary Objectives

1. **Launch Tech Hub:** Officially activate the data centre as a technology innovation hub
2. **Establish Sandboxes:** Design and deploy sandbox environments for safe experimentation
3. **Open Source Governance:** Create framework for government open-source contributions and consumption
4. **Build Community:** Engage developers, universities, startups in the tech hub ecosystem
5. **Knowledge Sharing:** Position T&T as Caribbean leader in open government technology

Secondary Objectives

- Adopt open standards and avoid vendor lock-in
- Create pathways for youth employment and skills development
- Establish Caribbean tech hub network
- Design sustainability model for tech hub operations
- Plan for emerging tech workshops (WS 3.2 series)

Target Participants (45-60 people)

Government Stakeholders (15-18)

- **MPAAI Data Centre Team** (5-6)
- Data Centre Director
- Tech Hub Program Manager
- Infrastructure architects
- Innovation leads
- **Technical MDAs** (4-5)
- Agencies with development capacity
- Innovation champions within government
- **National-CSIRT** (2-3)
- Security for sandbox environments
- **Procurement & Legal** (2-3)
- Open-source licensing experts
- Procurement specialists

Academic & Research Community (12-15)

- **Universities** (8-10)
- University of the West Indies (UWI)
- University of Trinidad & Tobago (UTT)
- Other tertiary institutions
- Computer science faculty
- Students (graduate and advanced undergraduate)
- **Research Institutions** (2-3)

• Technology research centers
• Innovation labs

Developer & Tech Community (10-12)

• **Local Developers** (6-8)
• Software engineers
• Open-source contributors

• Tech community leaders (meetup organizers, etc.)

• **Startups** (3-4)

• Tech startups
• Digital innovation companies

Regional & International (8-10)

• **Caribbean Partners** (4-5)
• Developers/academics from countries in WS 2.2

• Regional tech community leaders

• **EU & International Experts** (4-5)

• Barcelona/Amsterdam/Helsinki open-source government specialists
• GovStack or Digital Public Goods Alliance representatives
• Open-source governance expert

• Sandbox architecture specialist

• **CAF & EU Delegation** (2)

Detailed Agenda

DAY 1: Open Source, Open Standards, Open Government

Morning Session (9:00 AM - 12:30 PM)

9:00 - 9:45 | Opening & Tech Hub Launch
- **Official Launch Ceremony** (20 min)
- Ribbon-cutting or symbolic launch of tech hub
- Minister/Permanent Secretary remarks on innovation vision

- Tech hub manifesto/charter reading
- Video: "Tech Hub Vision 2030"

- **Workshop Introduction** (15 min)
- Objectives and agenda

- Participant introductions (rapid-fire: name, affiliation, one tech passion)

- **The Tech Hub Concept** (10 min)

- What is a tech hub vs. traditional data centre?
- Who can use it and how?
- What opportunities does it create?

9:45 - 11:00 | Open Source in Government: Global Movement
- **Presentation:** "The Case for Open Source in Government" (30 min)
- Benefits:
- Cost savings (no licensing fees)
- Transparency and trust
- Security through many eyes
- Avoid vendor lock-in
- Customization and control
- Economic development (local tech capacity)
- Risks and mitigation:
- Support and maintenance
- Security vulnerabilities (responsible disclosure)
- Skills and capacity
- Global trends: UK, France, Italy, Nordic countries

- **Case Studies:** "Open Government Success Stories" (35 min)

- **Barcelona, Spain** (15 min)

    - Presented by EU expert
    - Open-source-first policy
    - Barcelona Supercomputing Centre
    - Citizen participation platforms
    - Local tech ecosystem development

- **GovStack / Digital Public Goods** (10 min)

    - Building blocks approach
    - Open-source government software catalogue
    - X-Road (used in WS 2.1) as open-source example

- **Nordic Examples** (10 min)

    - Estonia's e-governance stack (largely open-source)

    - Helsinki's open data and developer APIs
    - Developer community engagement models

- **Q&A** (10 min)

11:00 - 11:15 | BREAK

11:15 - 12:30 | Open Standards & Interoperability
- **Presentation:** "Open Standards as Foundation" (25 min)
- What are open standards? (publicly available, vendor-neutral specifications)
- Why they matter (interoperability, competition, innovation)
- Examples:
- Web standards (HTML, CSS, HTTP)
- Data standards (JSON, XML, RDF)
- API standards (REST, OpenAPI from WS 2.1)
- Identity standards (OAuth, SAML from WS 1.1 and 2.3)
- Standard-setting bodies (W3C, IETF, OASIS, ISO)
- Relationship to open source (standards ≠ open source, but complementary)

- **Interactive Discussion:** "T&T Open Standards Policy" (40 min)
- Should T&T mandate open standards in government IT?
- Which standards to adopt? (Build on WS 2.1 decisions)
- How to enforce compliance?
- How to contribute to standard development?
- Draft policy principles:

    - Open standards preferred in procurement
    - Vendor proposals must explain any proprietary formats
    - Government data published in open formats
    - APIs follow open standards (REST, OpenAPI, OAuth)

12:30 - 1:30 PM | LUNCH

Afternoon Session (1:30 PM - 5:30 PM)

1:30 - 3:00 | Open Source Governance Framework
- **Presentation:** "Governing Open Source in Government" (25 min)
- Two sides of open source in government:
1. **Consuming open source** (using existing OSS)
2. **Contributing/producing open source** (publishing government code)

- Governance questions:

    - What licenses are acceptable? (MIT, Apache, GPL, etc.)
    - How to assess OSS security and quality?
    - How to contribute back to communities?
    - How to publish government-developed software?

    - What support model for OSS in production?
    - Intellectual property considerations
    - Procurement of OSS support services

- **Panel Discussion:** "Open Source in Practice" (30 min)

- Local developers who use/contribute to OSS
- Government IT staff
- University researchers

- Topics:

    - Current barriers to OSS adoption in T&T government
    - Skills and capacity needs
    - Community support ecosystems
    - Success stories and lessons learned

- **Breakout Workshop:** "T&T Open Source Policy" (40 min)

- 4-5 groups address different policy dimensions:

Group 1: Consuming Open Source
- Assessment criteria for OSS (security, community health, documentation)
- Approval process
- Support and maintenance strategy
- Preferred licenses

Group 2: Contributing to Open Source
- When should government contribute code?
- Code review and quality standards
- Licensing choices for government contributions
- Developer time allocation (government staff contributing on work time)

Group 3: Publishing Government Software
- What government software should be open-sourced?
- What should remain proprietary/closed? (Security considerations)
- Publication platforms (GitHub, GitLab, etc.)
- Documentation and community management

Group 4: Procurement & Sustainability
- How to procure open-source support/services?
- How to avoid vendor lock-in even with OSS?
- Funding open-source projects government depends on
- Building local OSS services industry

Develop draft policy recommendations

- **Report Back** (5 min per group, 25 min total)

3:00 - 3:15 | BREAK

3:15 - 5:00 | Sandbox Environments: Design & Deployment
- **Presentation:** "Sandbox Architectures for Innovation" (25 min)
- What is a sandbox? (isolated, safe environment for experimentation)
- Use cases:
- Government developers testing new technologies
- Universities doing research
- Startups prototyping products
- Hackathons and innovation challenges
- Training and skills development
- Types of sandboxes:
- Development/testing environments
- Data sandboxes (synthetic/anonymized data)
- API sandboxes (test APIs before production)
- Technology-specific sandboxes (AI/ML, blockchain, IoT - preview WS 3.2)
- Infrastructure requirements (compute, storage, network isolation)
- Security and access control

- **Technical Workshop:** "Designing T&T Tech Hub Sandboxes" (60 min)
- Mixed groups (government, university, developers)

Design sandbox environments:
- **General Purpose Dev Sandbox:**
- Cloud instances (VMs, containers)
- Development tools and frameworks pre-installed
- Access model (who can use, how to request)
- Resource quotas (prevent abuse)

- **Data Sandbox:**
  - Synthetic datasets for testing (population data, geographic data, etc.)
  - Privacy-preserving techniques
  - API access to government data (read-only, non-sensitive)
- **API Sandbox:**
  - Test versions of government APIs (from WS 2.1)
  - Mock services for cross-border APIs (from WS 2.3 pilots)
  - Documentation and tutorials
- **Emerging Tech Sandboxes** (preview for WS 3.2):
  - ML/AI sandbox (GPUs, ML frameworks, datasets)
  - Blockchain sandbox (test networks)
  - IoT sandbox (device simulators)

For each sandbox:
- Technical architecture
- Access policies
- Usage quotas and fair use
- Support model
- Cost estimate

Create sandbox catalogue and access portal mockup

- **Report Back & Discussion** (15 min)

5:00 - 5:30 | Day 1 Wrap & Networking
- Summary of open-source policy and sandbox designs
- Homework: Participants brainstorm potential sandbox projects
- Informal networking

DAY 2: Community Engagement & Activation

Morning Session (9:00 AM - 12:30 PM)

9:00 - 9:15 | Day 1 Recap & Day 2 Preview

9:15 - 10:30 | University Partnerships & Research
- **Presentation:** "Tech Hubs & Universities: Symbiotic Relationship" (20 min)
- Benefits to universities:
- Real-world infrastructure for research
- Student projects and thesis opportunities
- Internship and job pipelines
- Benefits to government:
- Innovation and fresh ideas
- Talent pipeline
- Cutting-edge research applied to public problems
- Partnership models from EU (Barcelona, Amsterdam, Helsinki)

- **University Lightning Talks** (30 min)
- 5-6 universities (5 min each)
- Current research interests
- How tech hub could support their work

- Student projects that could benefit

- **Partnership Design Workshop** (35 min)

- Mixed groups (government + universities + students)

Design university partnerships:
- **Student Projects:**
- Capstone/thesis projects using tech hub
- Internships at MPAAI
- Summer research programs

- **Faculty Research:**

  - Collaborative research projects
  - Access to infrastructure and data (with appropriate protections)
  - Joint publications

- **Skills Development:**

  - Government staff learning from university courses/workshops
  - University curriculum informed by government needs
  - Hackathons and innovation challenges

- **Governance:**

  - University advisory council for tech hub
  - Joint steering committee for research priorities
  - IP and publication policies

Draft MOU template for university partnerships

10:30 - 10:45 | BREAK

10:45 - 12:30 | Developer Community & Civic Tech
- **Presentation:** "Civic Tech & Government-Developer Collaboration" (20 min)
- What is civic tech? (technology for public good)
- Examples:
- Open data portals
- Government API hackathons
- Citizen engagement apps
- Service delivery improvements
- Code for America, Code for All network
- Developer community engagement strategies

- **Developer Panel:** "Building the T&T Tech Community" (30 min)
- Local developers and tech community leaders
- Current state of T&T tech community
- What would energize developer participation?
- What resources/support needed?

- How to make government development cool/attractive?

- **Ideation Workshop:** "Tech Hub Community Programs" (45 min)

- Brainstorm community engagement programs:

Potential Programs:
- **Hackathons:**
- Annual "GovTech Hackathon"
- Prizes for best solutions
- Real government challenges
- Winning solutions potentially adopted/funded

- **Developer Meetups:**
  - Monthly tech hub meetups
  - Lightning talks, project demos
  - Networking
- **Open Data Challenges:**
  - Government publishes datasets
  - Developers create visualizations/apps
  - Best apps showcased
- **Tech Talks & Training:**
  - Guest speakers (international, regional)
  - Workshops on emerging tech
  - Certification programs
- **Code Sprints:**
  - Contribute to government open-source projects
  - Improve documentation
  - Fix bugs, add features
- **Youth Programs:**
  - Coding clubs for high schools
  - Girls Who Code chapters
  - Tech career mentorship
- **Caribbean Developer Exchange:**
  - Regional hackathons
  - Developer exchanges between countries
  - Knowledge sharing

Vote on top 5 programs to launch in first year

- **Implementation Planning** (10 min)

- For top 2-3 programs, outline implementation:
    - Timeline
    - Resources needed
    - Organizers/champions
    - Metrics for success

12:30 - 1:30 PM | LUNCH

Afternoon Session (1:30 PM - 5:00 PM)

1:30 - 2:45 | Caribbean Regional Tech Hub Network
- **Presentation:** "Regional Digital Economy Opportunity" (20 min)
- Caribbean as small states with shared challenges
- Opportunity for shared tech infrastructure
- T&T tech hub as regional resource (building on WS 2.2)
- Examples:
- Shared sandbox environments for regional developers
- Cross-border hackathons
- Regional open-source projects
- Talent mobility and remote work opportunities

- **Caribbean Partner Presentations** (30 min)
- Representatives from 2-3 partner countries (from WS 2.2)
- Their tech ecosystems and innovation priorities

- Interest in regional tech hub collaboration

- **Regional Network Design** (35 min)

- How can T&T tech hub serve regional needs?
- Governance for regional access
- Potential regional projects:
    - Caribbean government open-source catalogue
    - Regional developer community platform
    - Shared datasets and APIs
    - Regional tech events and conferences

- Funding/sustainability for regional services

2:45 - 3:00 | BREAK

3:00 - 4:15 | Sustainability & Business Model
- **Presentation:** "Sustaining the Tech Hub" (20 min)
- Operating costs (infrastructure, staff, programs)
- Revenue/sustainability models:
- Government budget allocation (core funding)

- University partnership contributions
- Private sector sponsorships (WS 3.3 will expand)
- Regional country contributions (for shared services)
- Training and certification fees
- Cloud resource fees (for heavy commercial users)
- Grant funding (CAF, EU, other donors)
- Lean startup approach: Start small, prove value, scale

• **Business Model Workshop** (45 min)

• Develop tech hub business model canvas:

◦ **Value Propositions:**
◦ For government: Innovation, skills, cost savings
◦ For universities: Research infrastructure, talent development
◦ For developers: Tools, community, opportunities

◦ For Caribbean: Shared resources, collaboration

◦ **Revenue Streams:**

◦ Primary: Government funding

◦ Secondary: Partnerships, sponsorships, fees

◦ **Key Activities:**

◦ Infrastructure operation
◦ Community programs
◦ Training and capacity building

◦ Research and innovation

◦ **Key Resources:**

◦ Data centre infrastructure
◦ Staff (technical, community managers)
◦ Partnerships

◦ Brand and reputation

◦ **Costs:**

◦ Infrastructure (servers, network, power)
◦ Personnel
◦ Programs and events
◦ Marketing and community building

Draft 3-year financial sustainability plan

4:15 - 5:00 | Action Planning & Closing
- **Immediate Next Steps** (25 min)
- Finalize open-source policy (Month 7-8)
- Deploy initial sandboxes (Month 8)
- Launch first community program (Month 8-9)
- Formalize university partnerships (Month 8-9)
- Prepare for WS 3.2 (Emerging Tech - Month 8)

- **Commitments & Ownership** (10 min)
- Tech hub director/team commits to deliverables
- Universities commit to partnership discussions
- Developers commit to community participation

- Caribbean partners commit to regional collaboration

- **Workshop Evaluation & Closing Remarks** (10 min)

Key Discussion Questions

Policy Questions

- Should T&T mandate open-source-first in government procurement?
- What government code should be published openly vs. kept proprietary?
- How do we balance openness with security?
- How do we ensure open-source projects are maintained long-term?

Technical Questions

- What technologies should sandboxes support?
- How do we ensure security in shared sandbox environments?
- What data can safely be made available in data sandboxes?
- How do we prevent abuse of free sandbox resources?

Community Questions

- How do we build and sustain an active developer community?
- What incentives motivate developers to contribute to civic tech?
- How do we ensure diversity and inclusion in the tech community?
- How do we engage youth and build future talent pipeline?

Sustainability Questions

- Can the tech hub be financially self-sustaining?
- What mix of government funding and revenue generation is realistic?

- How do we demonstrate ROI to justify continued investment?
- How do we balance openness/access with cost recovery?

Expected Outputs & Deliverables

Immediate Outputs (During Workshop)

1. **Open Source Policy Framework** (draft)
2. Consuming OSS guidelines
3. Contributing OSS guidelines
4. Licensing standards
5. Procurement requirements
6. **Open Standards Policy** (draft principles)
7. **Sandbox Catalogue**
8. Technical specifications for each sandbox
9. Access policies
10. Resource quotas
11. **University Partnership MOU Template**
12. **Community Engagement Program** (top 5 programs selected with implementation outlines)
13. **Regional Tech Hub Network Concept**
14. **Tech Hub Business Model** and sustainability plan

Post-Workshop Deliverables (2-3 weeks)

1. **Workshop Report** (Product 3)
2. Executive summary
3. Open-source and open standards policies
4. Sandbox designs and deployment plan
5. Community engagement strategy
6. Partnership frameworks
7. Sustainability model
8. Next steps
9. **Tech Hub Operations Manual** (Appendix)

10. Governance
11. Access procedures
12. Support model

13. Fair use policies

14. **Community Engagement Playbook** (Appendix)
    - How to run hackathons
    - How to engage developers
    - Event templates
    - Communications strategies

Success Metrics

Participation Metrics

- 5+ universities represented
- 10+ developers/tech community members
- Caribbean partner participation
- Student attendance (10+)

Engagement Metrics

- Open-source policy framework drafted
- 3-5 sandbox environments designed
- 5+ community programs identified
- University partnership commitments

Satisfaction Metrics

- 4.4/5 average participant satisfaction
- 90%+ excited about tech hub potential
- 80%+ would participate in tech hub programs

Outcome Metrics

- Open-source policy adopted by government (within 1 month)
- First sandbox deployed (within 1 month)
- First community event scheduled (within 6 weeks)
- At least 2 university MOUs signed (within 2 months)

Connection to Other Workshops

Builds On:

- **Workshop 1.2 (Data Centre):** Infrastructure planned in WS 1.2 now activated as tech hub
- **Workshop 2.1 (Interoperability):** APIs and standards from WS 2.1 made available in sandboxes
- **Workshop 2.2 (Regional Cooperation):** Regional dimension extends tech hub across Caribbean
- **Workshop 1.3 (GID):** Inclusion principles applied to tech community building

Builds Foundation For:

- **Workshop 3.2 (Emerging Tech):** Sandboxes created here host AI/ML/blockchain/IoT experiments
- **Workshop 3.3 (Private Sector):** Tech hub becomes platform for private sector innovation
- **Workshop 3.4 & 4.1 (MDA Showcases):** Tech hub projects demonstrated

Creates:

- **Tech hub operational framework**
- **Developer/university community** (ongoing resource for project)
- **Sandbox environments** (infrastructure for WS 3.2)

Pre-Workshop Preparation

6 Weeks Before

- [ ] Confirm tech hub infrastructure is ready (servers, network, basic setup)
- [ ] Engage universities and developer community (build excitement)
- [ ] Book EU open-source government experts
- [ ] Identify local open-source champions/speakers

4 Weeks Before

- [ ] Finalize agenda with community input
- [ ] Send invitations to developers, universities, startups
- [ ] Engage Caribbean partners
- [ ] Prepare draft open-source policy for discussion

2 Weeks Before

- [ ] Send pre-reading materials:
- Open-source in government case studies (Barcelona, UK, etc.)
- Open standards overview
- Tech hub vision document from WS 1.2
- Invitation to propose sandbox project ideas
- [ ] Set up tech hub website/portal (even if minimal)
- [ ] Finalize logistics

1 Week Before

- [ ] Promote broadly in tech community
- [ ] Prepare live tech hub demo/tour
- [ ] Set up collaboration tools for ongoing community engagement
- [ ] Technical setup for any live coding demonstrations

Materials & Resources Needed

Presentation Materials

- PowerPoint slides for all sessions
- Videos showcasing open-source government success stories
- Live tech hub demo (tour of sandboxes, if ready)
- Open-source project examples (GitHub repositories, etc.)

Participant Materials

- Workshop agenda and guide
- Open-source policy template
- Sandbox design worksheets
- Business model canvas template
- Community program planning templates
- Notebook and pen
- Tech hub branded swag (t-shirts, stickers - build community identity)

Technology

- Projector and screen
- WiFi access (essential for developers!)
- Live coding/demo capability
- Access to tech hub sandbox environments (if ready)

- Collaboration platforms (Slack, Discord, or similar for ongoing community)

Facilities

- Tech-friendly venue (comfortable for developers, not overly formal)
- Plenary room + breakout spaces
- Power outlets and charging stations (lots of laptops!)
- Whiteboard walls or large paper for ideation

Documentation

- Photography and video (for community building and marketing)
- Note-takers
- Live-tweeting/social media coverage

Budget Estimate

Category	Item	Estimated Cost
Venue	2-day room + breakouts (tech-friendly)	$3,000
Catering	Coffee breaks (4), lunches (2), snacks	$4,500
Travel - Caribbean Partners	2-3 countries × 2 people	$8,000
Travel - EU Experts	2-3 experts, flights & accommodation	$15,000
Materials	Printing, supplies, tech hub swag	$2,000
Technology	AV, demo setup, collaboration tools	$1,500
Community	First community event seed funding (hackathon/meetup)	$3,000
Marketing	Tech hub launch promotion, website	$2,000
Contingency	10%	$3,900
TOTAL		**$42,900**

Risk Mitigation

Risk	Mitigation
Low developer turnout	Heavy community promotion; engage existing tech groups; make it fun and valuable; offer incentives
Open-source policy resisted by procurement/legal	Education on benefits; start with permissive policy; EU expert credibility; phased approach
Tech hub infrastructure not ready	Have backup plan for demos; focus on community building if infrastructure delayed; virtual sandboxes as interim
Universities unable to commit	Start with 1-2 willing universities; build success stories; expand partnerships later
Sustainability concerns prevent investment	Emphasize lean startup approach; demonstrate value through quick wins; external funding for initial phase
Lack of diversity in tech community	Proactive outreach to women, youth, underrepresented groups; GID Advisory Committee involvement; inclusive event design

Gender & Inclusion Considerations

Representation

- Actively recruit women developers and students
- Partner with Women in Tech organizations
- Ensure university delegations include women faculty and students
- Youth voices prominent

Content

- Community programs explicitly include diversity goals (Girls Who Code, etc.)
- Accessibility of sandbox access (not just for elite developers)
- Multiple skill levels welcomed (beginners to advanced)
- Scholarships/support for underrepresented groups to participate

Process

- Welcoming, inclusive atmosphere (not intimidating "bro" culture)

- Code of conduct for tech community
- Safe reporting mechanisms for harassment
- Mentorship programs for newcomers

Follow-up Actions (Post-Workshop)

Week 1

- [ ] Send thank you emails with links to tech hub portal/community
- [ ] Begin drafting open-source policy (final version)
- [ ] Technical team begins sandbox deployment
- [ ] Schedule first community meetup

Week 2-3

- [ ] Finalize and publish workshop report
- [ ] Circulate open-source policy for government approval
- [ ] Launch first sandbox environment (even if limited)
- [ ] Begin university MOU discussions

Week 4-6

- [ ] Host first community event (meetup or small hackathon)
- [ ] Open-source policy approved and published
- [ ] University partnerships formalized
- [ ] Prepare for WS 3.2 (Emerging Tech)

Ongoing

- [ ] Monthly community meetups
- [ ] Quarterly university coordination meetings
- [ ] Continuous sandbox improvements
- [ ] Content creation (blog posts, tutorials, showcasing projects)
- [ ] Metrics tracking (sandbox usage, community growth, projects launched)

Links to TOR Requirements

This workshop directly addresses:

TOR Section 5, Objective C: Data Centre Expansion Actions
- **Action c:** "Support the conduct of workshops (approx. 5) to develop the data centre as a tech

hub with sandboxes for open-source, Artificial Intelligence (AI), Machine Learning (ML), blockchain, and Internet of Things (IoT)." [This is workshop 1 of 5]
- **Action f:** "Ensure that all data management activities take into account international best practices, standards, and digital solutions..."

TOR Section 6, Services:
- **Service 5:** "Develop strategies to engage Caribbean and international stakeholders, particularly from smaller countries that represent international best practice..."
- **Service 6:** "Actively seek and evaluate international solutions, technologies, and best practices..."

TOR Section 7, Products:
- **Product 3:** Workshop Reports

Document Status: Draft for Review
Version: 1.0
Date: September 26, 2026
Next Review: 2 weeks before workshop execution

COMMUNITY NOTE: This workshop is as much about culture change as technology. Success requires authentic engagement with the tech community, not just a one-time event. Budget time and resources for ongoing community management beyond the workshop itself.
